

Ram Mohan Reddy Seelam Software Engineer

srammohanreddy23@gmail.com | 9640129572 | Hyderabad | [linkedin.com/in/rammohanreddy-s](https://www.linkedin.com/in/rammohanreddy-s)

PROFILE

- **Full Stack Java Developer** with 3+ years of experience in designing and building scalable microservices using Core Java, Spring Boot, REST APIs, and React.js, with strong expertise in backend development and working knowledge of frontend technologies.
- Strong understanding of OOPs, multithreading, and distributed systems. Experienced across the full SDLC in Agile environments, with hands-on expertise in CI/CD pipelines, cloud-based deployments, performance optimization, and secure application design.

PROGRAMMING SKILLS

Backend Technologies: Core Java (Java 8/11/21), Object-Oriented /Programming (OOPs), Collections Framework, Exception Handling, Multithreading & Concurrency, Java Streams & Lambda Expressions, Spring Boot, Microservices Architecture, REST APIs, JPA, Hibernate, Eureka Server, Redis (Caching)

Frontend Skills: HTML, CSS, JavaScript, React.js, Responsive UI, Single Page Applications (SPA)

Security: Spring Security, JWT, OAuth2, API Authentication & Authorization

Testing & Quality: JUnit, Mockito, Unit Testing, Integration Testing, Debugging & Performance Optimization

Containerization & Deployment: Docker, Kubernetes

DevOps & Tools: Git, GitHub, Bitbucket, SonarQube, Maven, Gradle, Jenkins, GitHub Actions, CI/CD Pipelines, Postman, GitHub Copilot

Monitoring & Cloud: Datadog, Cytoscape, WIZ, Microsoft Azure

Logging: Apache Log4j2, SLF4J

PROFESSIONAL EXPERIENCE

NielsenIQ

Software Engineer

Jul 2023 – Apr 2026 | Chennai, India

- Worked as a **Java Full Stack Developer** using **Spring Boot, React.js, REST APIs, and MySQL** in a Microservices architecture, contributing to end-to-end application development and seamless frontend-backend integration
- Developed and enhanced backend features for BI services using **Spring Boot and RESTful APIs**, ensuring seamless **service-to-service integration and smooth frontend data consumption**
- Led migration of legacy BI services into microservices (**BIPS, BIQS**), reducing technical debt and achieving **35% cost optimization**
- Implemented data deduplication logic (“Suppressing Dupe Dots”) using **efficient data processing techniques**, reducing cloud usage by **28%**
- Applied **Core Java, Java Streams, and multithreading/concurrency concepts** to improve system performance and scalability
- Optimized logging using **Datadog and Log4j2**, significantly reducing monitoring costs
- Contributed to reporting features by enabling **backend-driven data rendering for UI components** (charts, tables, templates), ensuring seamless **frontend-backend integration**
- Enhanced Metadata Change Management (MCM) system, scaling processing capacity from **20K → 1M records per run**
- Automated end-to-end workflows and deployments using **CI/CD pipelines (Jenkins, GitHub Actions)**, reducing manual effort
- Collaborated in Agile teams for **code reviews, requirement analysis, and system design**, ensuring timely delivery

Software Engineer Intern

Feb 2023 – May 2023 | Chennai, India

- Built and optimized **RESTful APIs using Java (Core Java), Spring Boot, Hibernate, and MySQL**, ensuring scalable and high-performance backend solutions
- Strengthened application security by implementing **DevSecOps practices and secure coding standards**, improving Product Security Scorecard from **Level F to Level C**
- Achieved **90% code coverage** using **JUnit and Mockito**, ensuring robust unit and integration testing for reliable application performance
- Applied **OOP principles, exception handling, and debugging techniques** to enhance code quality and maintainability
- Collaborated in Agile development workflows, contributing to feature development, testing, and continuous improvement of backend services

PROJECTS

Learning Management System (Microservices, Spring Boot, React)

Role: Full Stack Developer

- Built a full-stack LMS using **microservices architecture**, supporting modules like authentication, courses, enrollment, and progress tracking
- Developed scalable backend services using **Spring Boot, REST APIs, Hibernate, and MySQL**
- Improved API response time by **~2x** using **Spring Cache abstraction and query optimization techniques**
- Tested system under **200+ concurrent users**, maintaining stable response times (**<300ms**)
- Implemented **stateless authentication using JWT and Spring Security**, enabling horizontal scalability
- Ensured data consistency using **ACID-compliant transactional operations** across relational entities
- Developed responsive UI using **React.js, JavaScript (ES6+), HTML5, and CSS3**

Job Portal (Spring Boot, MySQL, HTML, CSS, JavaScript)

Role: Full Stack Developer (Backend Focus)

- Built a full-stack job portal enabling job seekers and recruiters to manage job listings and applications using **Spring Boot, Core Java, and MySQL**
- Developed **10+ RESTful APIs** using **Spring Boot, Hibernate (JPA), and Core Java** for authentication, job postings, and application workflows
- Designed and optimized **relational database schema** using **SQL and Hibernate** for efficient data storage and retrieval

- Implemented **role-based authentication and authorization using Spring Security (session-based)** to ensure secure user access
- Developed dynamic frontend features using **HTML5, CSS3, and JavaScript (ES6+)** for job search and recruiter dashboards
- Ensured seamless **frontend-backend integration** through REST API communication

Factory Production Tracking System (Microservices, Spring WebFlux, React)

Role: Full Stack Developer

- Developed a **microservices-based system** using **Spring WebFlux (Reactive Programming)** to handle high-frequency, real-time production data
- Applied **asynchronous and non-blocking processing** to improve system throughput and scalability
- Improved dashboard performance by **~35%** through optimized data processing and efficient API design
- Built interactive dashboards using **React.js** with real-time insights on production trends, machine usage, and shift-wise analytics
- Designed RESTful APIs for inter-service communication in a distributed system architecture

CERTIFICATIONS

- Spring Boot 3, Spring 6 & Hibernate by Chad Darby - Udemy
- GitHub Actions - GH-200
- HTML, CSS, and JavaScript for Web Developers by Johns Hopkins University

EDUCATION

Bachelor of Technology | Computer Science and Engineering | GPA - 8.83,
Amrita Vishwa Vidyapeetham

2019 – 2023 | Amritapuri, Kerala, India
